

## 1RU Cabinet Controller

### Description

**1RU** Cabinet Controller is designed to supply power and report connection information to the Host PC for all intelligent expansion panels within a cabinet.

### Specifications

- 1U High(1.75") x 19"W x 10"D
- High strength steel construction.
- **Finish:** Durable fine textured black powder coat.
- Rack mountable in 19", 23" or 24" cabinets.
- **Power requirement:** 10 watts per panel
- **Power distribution:** 24VDC

### Features / Benefits

- 1 unit high for minimal rack space.
- Rack mountable options for connectivity facing either the front or rear of the cabinet.
- RS232 communication between expansion panels.
- (1) 100 BaseFX Ethernet intelligent port for zone connectivity.
- (4) 100 BaseT Ethernet ports for cabinet controller connectivity.
- Ethernet connectivity between cabinet controller and Host PC.
- Modular field replaceable redundant power supplies.
