

10U 11 SLOT MODULAR ADAPTER PANELS

DESCRIPTION

The 10U 11 slot Modular Adapter panels are used to populate DCS's 10U 11 Slot modular enclosure. The 10U Enclosure houses the same amount of Modular Adapter Panels as the Cisco Director Class Switch allows for fiber channel switching modules. As you add channel switching modules to the Director, you can mimic the configuration to the modular enclosure by adding adapter panels with the same port count. With this solution you can easily identify the Director, slot location, and port number at the CAP.

FEATURES / BENEFITS

- Color coded options to easily identify Fabrics or Fiber type
- Labeled to match director port labeling
- Snap on mounting for fast and easy installation and removal
- Eliminate custom port labeling
- Rear Cable Management Plate

SPECIFICATIONS

Dimensions: (H x W x D) 16.779" x 1.525" x .665"

- Aluminum Construction
- Durable fine textured powder coat finish
- Used to populate DCS 10U 11 Slot Modular Enclosures and Frames
